The ToUcam PRO II incorporates the latest digital imaging technology to ensure you get the very best quality images for video conferencing, on-line chatting and video mails.

High quality pictures and video even at low light

The high-sensitivity CCD sensor and automatic exposure guarantee brilliant results even at very low light levels. The lighting luminance can be as low as 1 Lux, so the ToUcam PRO II is perfect for in-house and low lighting environments. You can now make video calls and record images at almost any time of day or night.

1.2 Megapixels for pin-sharp images

At an impressive 1280 x 960 pixels, the maximum image resolution is about the best you can get for a high-performance webcam. Snap, edit and archive software is included.

Superb realistic video at 60 frames per second

With up to 60 frames per second, the ToUcam PRO II lets you make realistic, full-screen full-motion video. And with the full suite of software, you can not only hold net meetings and create or edit your clips but also incorporate motion detection and set up a video answering machine.

Built-in digital microphone

The built-in digital microphone ensures impeccable soundtracks for your videos and perfect audio for on-line chatting. And forget about having to hang an external microphone on your monitor.

Perfect webcam for broadband Internet

With its VGA (640 x 480) resolution, streaming video and high-quality audio capabilities, the ToUcam PRO II ensures great performance video-chatting especially with a broadband Internet connection.

“XP plug & play”

Windows XP users do not need to install any software. Just plug the ToUcam II to a free USB slot of your PC and you can start using any application under Windows XP.
